

Let's practice storytelling!

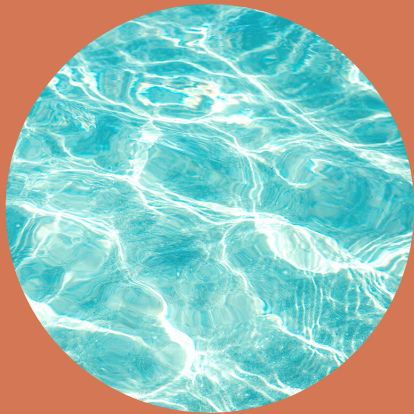

Story Challenge

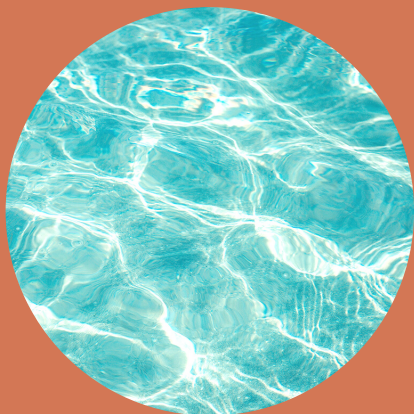

1. Capture Water, based on the talk, take 3 photos of water in a different way based on different characteristics or settings.

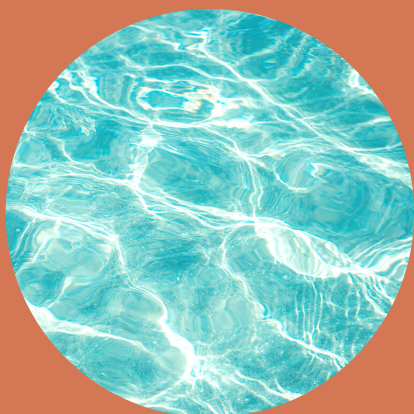

2. Think about YOUR water story, write out a particular memory or moment regarding water using our Storybuilding method including an introduction, action, and conclusion

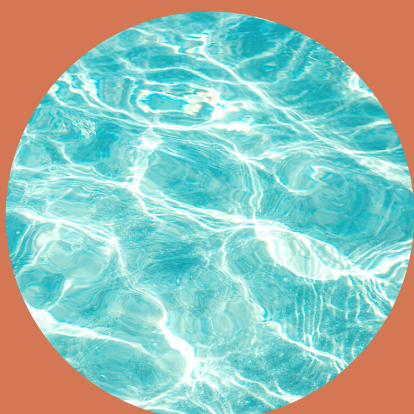

3. Learn a new engagement technique that can help you communicate water with your community

4. Explore 1 new camera technique you learned regarding light, perspective, rule of thirds, and timing.

5. Talk with someone about what responsible storytelling is and how to use it in your water story or community work.
